69     stockInput(book, stock, stockName);
70     displayOutput(book, stock, stockName);
71     System.out.println("The amount of book that can still be borrowed is: "+bookBorrowed(stock));
72     biggestInStockBook(stock, book);
73     biggestDamagedBook(stock, book);
74 }
75 }
```

THE OUTPUT

```
---Enter The Amount of Stock---
Database book
in-Stock: 20
Damaged-Stock: 4
Out-Of-Stock: 1

Mathematics book
in-Stock: 40
Damaged-Stock: 7
Out-Of-Stock: 0

Algorithm book
in-Stock: 50
Damaged-Stock: 20
Out-Of-Stock: 10

---Display All The Book Stock---
Database:
in-Stock: 20
Damaged-Stock: 4
Out-Of-Stock: 1

Mathematics:
in-Stock: 40
Damaged-Stock: 7
Out-Of-Stock: 0

Algorithm:
in-Stock: 50
Damaged-Stock: 20
Out-Of-Stock: 10

The amount of book that can still be borrowed is: 110
The book with the largest in-stock that can be borrowed is Algorithm
Book that are heavily borrowed is Algorithm
```
